

Understanding margin, pip value, & swap fees

Click here to visit our **Trading Calculator** for a smarter trading experience, and check symbol specifications for the latest updates!

Margin is the initial fund needed to open a trade.
It's crucial for risk management.

A **pip** is the smallest change in price,
telling you how much you stand to gain or lose.

Swap fees apply when you hold a position past 21:59 GMT.
Watch for these charges if trading overnight.

Extra tip

For symbol specifications, check the symbol specification on your CFDs platform for a real-time update.
